Efficient System Management for Mobile Devices

Mobile devices impose increasing challenges on system administrators. When using mobile data acquisition devices, PDAs, or smartphones in critical business processes, smooth operation of your installation soon becomes a key success factor for your company. A major management task when you have a system supporting hundreds or thousands of devices!

- Does any user have the software required for the work process installed on his handheld?
- Are the system components and drivers up-to-date?
- Are all devices in use? How and where are they used?
- A user requires support. You want to help online!
- How do you integrate mobile devices into the IT environment of your company?

skeye.com

A Flexible Solution for an Efficient Management of Mobile IT Systems

Using skeye.com you may automate the configuration as well as the data and software management thus improving the economy of your mobile devices. skeye.com, your best tool for

- rollout of devices
- software installations and updates
- configuration of keys and certificates for Wireless LAN and VPN
- management of system parameters
- remote maintenance and remote administration

Control your data flows and automate backups for your mobile devices. skeye.com provides you with a powerful data conversion module for the smooth IT integration of mobile business processes.

skeye.com enables time and event based push-pull communication via any network, workflow support, integrated reporting and much more. This helps to save valuable working time and optimises your process quality.

You may assign your mobile devices to any group, for example according to company structures, locations, user groups or appropriate processes. Automatic tasks can be applied to both, individual devices and structured groups: At the push of a button you can supply your regional field staff with new software versions while the office devices are getting the latest stock list. Using detailed reports, you may track any activity in skeye.com and solve problems immediately.

When you want to efficiently manage mobile IT systems, skeye.com is a must have for you. Apart from its outstanding characteristics, it can be individually and economically adapted to your personal needs due to its integration framework and plug-in interfaces.
